# COLLIN DOYLE

**IT Operations & Automation Lead**

Fort Myers, FL · cj.doyle@outlook.com · linkedin.com/in/collinjdoyle · github.com/CollinJDoyle

## SUMMARY

IT operations lead with 10+ years across help desk, infrastructure and cloud. I manage IT through automation: systems that provision, track, train and report on themselves, so a small team runs like a much larger one. Deep expertise in Microsoft 365 / Entra ID, identity and SSO/SAML, AWS and bare-metal Kubernetes, and I design and build the internal platforms that tie them together. Lead a 3-person IT team; focused on growing into IT management.

## CORE SKILLS

- **Leadership & ITSM:** Team leadership, help desk management, onboarding/offboarding, SaaS & vendor management (60+ apps), Jira, IT process automation
- **Identity & M365:** Microsoft 365, Entra ID, Intune, Active Directory, Exchange, SSO/SAML
- **Cloud & Infrastructure:** AWS, bare-metal Kubernetes, Rancher, Docker, ArgoCD, on-prem AI
- **Automation & Dev:** PowerShell, Node.js, JavaScript/TypeScript, Bash, CI/CD (GitHub Actions), Git
- **Networking & Security:** TCP/IP, 802.11, VPN, firewalls (Palo Alto, SonicWALL, Unifi), VOIP, BGP, uptime monitoring (BetterStack)
- **Platforms & Virtualization:** Windows, Linux, macOS, VMware ESXi, Citrix XenApp

## EXPERIENCE

**Systems Administrator, Team Lead — Eightpoint** Cape Coral, FL · Jan 2020 – Present

- Lead a 3-person IT team supporting **170 employees across 3 locations**, **400+ endpoints**, 10+ on-prem servers, and a substantial AWS footprint.
- Administer **Microsoft 365 / Entra ID / Intune**; consolidated multiple M365 tenants into one during a company merger.
- Manage **60+ SaaS applications**, implementing **SSO/SAML** across the majority to centralize identity and access.
- Cut new-hire provisioning from **4–6 hours to under 1 hour** with end-to-end onboarding/offboarding automation.
- Built **automated ticket triage** and **zero-touch access-request** workflows, eliminating manual routing and saving significant team hours.
- Designed and built a **bare-metal Kubernetes cluster from scratch** (Rancher-managed) running internal applications via CI/CD (GitHub Actions + ArgoCD); deployed **on-prem AI** solutions on the cluster.
- Designed and built a suite of internal apps in **React, Node.js, Postgres and Kubernetes**: a people/identity platform with approval-gated account creation, a scannable IT inventory with MDM sync, a learning platform with SCIM and Slack, an employee hub with live room status, and a domain manager. Writeups at collin.rocks.
- Maintain high availability across services with BetterStack and additional monitoring; administer Exchange, networking, VPN, and security across multi-site infrastructure.

**Systems Administrator / Network Technician — Collier County Sheriff's Office** Naples, FL · 2018 – 2019

- Managed and maintained servers, PCs, routers, and switches.
- Installed, configured, and administered network technologies.
- Engaged users and resolved issues quickly while keeping them calm and satisfied.
- Performed technical troubleshooting across a wide variety of systems and applications.
- Monitored and maintained servers and networking devices using monitoring software.

**Network Engineer — Softrim** Fort Myers, FL · 2017 – 2018

- Led a team of technicians on a single-client help desk (Citrix XenApp, LANDESK/Autotask).
- Provided onsite network, server, and desktop support for small-to-medium businesses alongside the consulting team.
- Maintained the MS Exchange environment and managed system backups for all clients.
- Reviewed active ticket queues to ensure timely resolution; strong ticket escalation and problem resolution across diverse environments.
- Created a patch-management system for a large client.

**Systems Administrator / Network Engineer — Florida Cancer Specialists** Fort Myers, FL · 2017

- Dispatched incoming tickets to the correct teams and local technicians; scheduled onsite visits to clinics across Florida.
- Ordered, tracked, and received hardware for new clinic deployments (e.g., 100 thin clients, 10 switches, 2 routers, 3 servers, 200 monitors).
- Resolved multiple client issues onsite in a timely, professional manner.

**Network Support Engineer II — Greenwire Technology** Cape Coral, FL · 2016 – 2017

- Performed monthly onsite visits to ensure clients were fully supported and satisfied.
- Managed multiple server deployments including AD DS, 3CX, Exchange, and file servers.
- Built redundant networks tailored to individual client needs; repaired neglected or incorrectly installed networks.

**Desktop Support Engineer — ATOS (contractor for Lee County)** Fort Myers, FL · 2014 – 2015

- Performed remote troubleshooting across a wide variety of systems and applications.
- Engaged and tracked priority issues with responsibility for documentation, resolution, and closure.
- Repaired desktops and laptops with a wide range of hardware and software problems; serviced Dell hardware and printers/copiers/scanners.

## CERTIFICATIONS

CompTIA Server+ (active) · MCSA · CompTIA A+ · CompTIA Network+ · Certified ScrumMaster (CSM)

## EDUCATION

Florida SouthWestern State College — Computer Science coursework (2015–2017)

Dunbar High School — Academy of Technology Excellence; earned 32+ industry IT certifications (held the most in the 2014 graduating class).
