COLLIN DOYLE

IT Operations & Automation Lead

Fort Myers, FL · cj.doyle@outlook.com · linkedin.com/in/collinjdoyle · github.com/CollinJDoyle

SUMMARY

IT operations lead with 10+ years across help desk, infrastructure and cloud. I manage IT through automation: systems that provision, track, train and report on themselves, so a small team runs like a much larger one. Deep expertise in Microsoft 365 / Entra ID, identity and SSO/SAML, AWS and bare-metal Kubernetes, and I design and build the internal platforms that tie them together. Lead a 3-person IT team; focused on growing into IT management.

CORE SKILLS

- **Leadership & ITSM:** Team leadership, help desk management, onboarding/offboarding, SaaS & vendor management (60+ apps), Jira, IT process automation
- **Identity & M365:** Microsoft 365, Entra ID, Intune, Active Directory, Exchange, SSO/SAML
- **Cloud & Infrastructure:** AWS, bare-metal Kubernetes, Rancher, Docker, ArgoCD, on-prem AI
- **Automation & Dev:** PowerShell, Node.js, JavaScript/TypeScript, Bash, CI/CD (GitHub Actions), Git
- **Networking & Security:** TCP/IP, VPN, firewalls (Palo Alto, SonicWALL, Unifi), VOIP, uptime monitoring (BetterStack)

EXPERIENCE

Systems Administrator, Team Lead — Eightpoint Cape Coral, FL · Jan 2020 – Present

- Lead a 3-person IT team supporting **170 employees across 3 locations**, **400+ endpoints**, 10+ on-prem servers, and a substantial AWS footprint.
- Administer **Microsoft 365 / Entra ID / Intune**; consolidated multiple M365 tenants into one during a company merger.
- Manage **60+ SaaS applications**, implementing **SSO/SAML** across the majority to centralize identity and access.
- Cut new-hire provisioning from **4–6 hours to under 1 hour** with end-to-end onboarding/offboarding automation.
- Built **automated ticket triage** and **zero-touch access-request** workflows, eliminating manual routing and saving significant team hours.
- Designed and built a **bare-metal Kubernetes cluster from scratch** (Rancher-managed) running internal apps via CI/CD (GitHub Actions + ArgoCD); deployed **on-prem AI** on the cluster.
- Designed and built a suite of internal apps (**React, Node.js, Postgres, Kubernetes**): people/identity platform, scannable IT inventory, learning platform, employee hub and domain manager; writeups at collin.rocks.

Systems Administrator / Network Technician — Collier County Sheriff's Office Naples, FL · 2018 – 2019

- Managed servers, workstations, routers, and switches; troubleshot diverse systems and monitored infrastructure health.

Network Engineer — Softrim Fort Myers, FL · 2017 – 2018

- Led a technician team on a client help desk; delivered network, server, and desktop support and built a patch-management system for a large client.

Earlier: Systems Administrator roles at Florida Cancer Specialists (2017) and Greenwire Technology (2016–2017), and Desktop Support at ATOS / Lee County (2014–2015).

CERTIFICATIONS

CompTIA Server+ (active) · MCSA · CompTIA A+ · CompTIA Network+ · Certified ScrumMaster (CSM)
